

Environmental Policy

PSF Limited has been producing industrial housings for a wide variety of industries for some years. Principle activities include, welding, fabrication and paint spraying.

PSF recognizes its environmental responsibility and is committed to significantly reducing its impacts on the environment, whilst maintaining high standards of quality and customer service. Its main impacts consist of energy consumption, waste disposal, low level solvent emissions and its use of potentially harmful chemicals.

Through this commitment we will -

- Comply with all applicable environmental legislation
- Communicate to all levels the importance of environmental responsibility through training and awareness
- Prevent pollution incidences through control procedures and provision of control equipment
- Minimise energy and water consumption through regular monitoring and investigation into efficiency methods
- Monitor levels and types of waste production
- Strive to reduce waste through recycling and more stringent use of materials
- Collaborate with suppliers, contractors and customers to improve integrated environmental performance

PSF Limited is committed to implementing its' Environmental Management System (EMS), which will ensure that monitoring, auditing and review of its policies, procedures and legal compliance regularly takes place. Moreover, the company will strive to continually improve its environmental performance including the review and reduction of its impacts.

This policy will be made available throughout the company and to other interested parties.
